

What are your plans after graduation?

*Are you majoring or minoring in mathematics or science?
Are you thinking about becoming a teacher or getting involved in
some other aspect of education?*

The University of Maine's **Master of Science in Teaching (MST)** degree might be right for you!

The University of Maine's Research in STEM Education (RiSE) Center is the interdisciplinary home to the MST program designed specifically for people who want to become middle or high school mathematics or science teachers, college teachers of mathematics or science, or pursue other education-related careers in STEM (e.g., researcher, curriculum developer, teacher educator, etc.).

This two-year program provides opportunities for students to:

Learn science and mathematics in courses taught using research-guided pedagogy and curricula, including hands-on, inquiry-based methods

- Learn how to design, conduct, and interpret science and mathematics education research
- Learn about effective use of technology in the classroom
- Have supervised teaching experience in classrooms implementing best practices indicated from research, and
- Work toward certification to teach at the secondary level in their field (if desired).

Assistantships available to full-time students that include tuition and a stipend.
