

Dear Students,

Big News: BSME is aiming to re-open our in-person program during the Fall 2021 semester!

Budapest Semesters in Mathematics Education (BSME) is a study abroad program in Budapest, Hungary, designed for those interested in the learning and teaching of secondary mathematics. BSME participants explore the *Hungarian pedagogy*, in which a strong emphasis is placed on problem solving, mathematical creativity, and communication.

Why BSME? Today's teachers are expected to provide students with opportunities to struggle productively towards understanding, and the Hungarian pedagogy has the potential to play a critical role in this endeavor. At BSME, we are excited for our participants to develop this new perspective on mathematics education.

In addition to the Fall 2021 semester, we are also accepting applications for the second half of the Spring 2021 semester and the Summer 2021 program, both conducted online. All applications are reviewed on a rolling basis, so apply early! More information, including the online applications, can be found at www.bsmeducation.com.

If you have any questions, please do not hesitate to contact our office at bsme@bsmeducation.com.

Best wishes,

Ryota Matsuura
North American Director, BSME
