## DEVELOP YOUR CAREER

with NASA's Applied Sciences' Capacity Building  
DEVELOP National Program

**What is DEVELOP?**  
DEVELOP addresses environmental and public policy issues through interdisciplinary research projects that apply the lens of NASA Earth observations to community concerns around the globe. Bridging the gap between NASA Earth science and society, DEVELOP builds capacity in both participants and partner organizations to better prepare them to address the challenges that face our society and future generations.

Teams of DEVELOP participants partner with decision makers to conduct rapid feasibility projects that highlight relevant applications of Earth observing missions, cultivate advanced skills, and increase understanding of NASA Earth science data and technology.

### About Projects

 Water Resources	 Energy
 Ecological Forecasting	 Food Security & Agriculture
 Health & Air Quality	 Disasters
 Transportation & Infrastructure	 Urban Development
